Knowledgebase Assistant – Google Opal Topic 11

A Governed Knowledgebase Assistant built using Google Opal to answer routine employee questions from SOP documents and route sensitive HR, legal, and compliance queries for human review.

Project Features

- Employee workplace query input.
- OPERATIONAL and SENSITIVE query classification.
- Conditional workflow routing.
- SOP-grounded operational answers.
- Human escalation notification preparation.
- Final response display.

Workflow

1. Employee Query
2. Classification Result
3. Governance Classifier
4. Grounded Research Agent or Human Escalation Handler
5. Display Response

Demonstration Knowledge Sources

- `employee_leave_policy.md`
- `it_support_sop.md`
- `expense_reimbursement_policy.md`

These are fictional demonstration SOPs, not actual company policies.

Repository Structure

Testing Summary

Test	Status
Operational query classification and display	PASS
Sensitive query classification and display	PASS
Separate escalation notification	PASS
Email delivery	NOT CONFIGURED
Full SOP grounding verification	PASS

Technology

- Google Opal
- AI-powered workflow automation
- Markdown SOP documents

Limitations

The assistant does not independently resolve sensitive complaints or interpret employment contracts. Email delivery is not confirmed or configured in this demonstration.

Learning Project

Developed as part of Google Opal Topic 11 – Governed Knowledgebase Assistant.
